

SkillTect Technologies Private Limited

Job Description: Cloud AI Engineer – Cloud & Data (GCP)

Company Overview

At SkillTect Technologies, we engineer the future. We are building the next generation of intelligent, autonomous systems and are looking for forward-thinking engineers to drive our Generative AI and Agentic workflow initiatives on Google Cloud Platform.

Key Information

- Experience Required: 5+ Years of total IT experience
- Locations: Bangalore & Mumbai
- Work Mode: Hybrid

Required Skills

- Strong experience with Google Cloud Platform (GCP), Vertex AI, and AI/ML solutions
- Expertise in Python development and API integrations
- Hands-on experience with LangChain, CrewAI, AutoGen, and RAG pipelines
- Knowledge of BigQuery, Dataproc, Dataplex, and Vector Databases
- Experience with Docker, Kubernetes, Git, and CI/CD pipelines

Responsibilities

- Build and deploy scalable AI applications on GCP
- Develop intelligent multi-agent AI workflows
- Work on Prompt Engineering, Context Engineering, and RAG architectures
- Design production-grade cloud-native AI systems
