Professional Summary

Frontend Developer with over 4.5 years of experience building modern, responsive, and highly performant web applications. Specialized in crafting stunning, accessible user interfaces using React, Next.js, and TypeScript. Proven track record of turning complex requirements into polished, elegant user experiences while optimizing web performance and SEO. Adept at collaborating in agile remote environments to deliver scalable frontend architectures, driving measurable increases in user engagement and operational efficiency.

Live Projects

ScalePart (eVehicle Platform)

- Engineered a high-performance frontend dashboard handling **50,000+ unstructured catalog entries** via AI extractions.
- Optimized React rendering cycles, reducing initial page load times by **40%** for a seamless user experience.
- Live Link: <https://scalepart.com/>

MOOC Ed-Tech Platform (Jalshaala)

- Architected a full-scale Ed-Tech frontend supporting over **5,000+ active students** with zero UI bottlenecks.
- Achieved a **95+ Lighthouse Performance Score** by implementing advanced caching and lazy loading techniques.
- Live Link: <https://new.jalshaala.com/?showWebsite=true>

Experience

Troology

Sept 2025 – Present

Frontend Engineer

On-Site

- Spearheading the frontend architecture of the **eVehicle platform (ScalePart)**, delivering a highly responsive user interface that reduced data rendering times by **45%** for complex catalog data.
- Optimized frontend-to-backend communication with **RESTful APIs**, reducing data payload sizes and slashing dashboard load latency by **60%**.
- Integrated external LLM endpoints into the React UI, creating intuitive workflows that automated **80%** of manual document data entry for users.
- Ensured seamless state integration across complex **React.js/TypeScript** views, boosting overall **Lighthouse performance and accessibility scores to 95+**.
- Contributed to the **UPSDMA** platform (Rahat Sewa App) for SDRF personnel, developing highly concurrent UI features with **99.9% frontend uptime** during critical disaster scenarios.

Cognitivo

Jun 2024 – Aug 2025

Frontend Developer

Hybrid

- Refactored legacy UI components using **React.js, TypeScript, Material UI, and Tailwind CSS**, drastically cutting First Contentful Paint (FCP) by **1.2 seconds** and achieving a **100% web accessibility (a11y) score**.
- Collaborated closely with backend engineers to consume optimized GraphQL APIs, ensuring smooth UI hydration and flawlessly supporting a **50% increase in concurrent user traffic**.
- Integrated **OpenAI GPT-based conversational interfaces** directly into the frontend, automating **40%** of user support queries and increasing overall user retention by **25%**.
- Implemented **Web Push Notifications** using Service Workers and VAPID keys, boosting Daily Active User (DAU) engagement by **35%** through real-time alerts.
- Enhanced cross-team efficiency by building custom frontend dashboards integrated with Monday.com webhooks, reducing manual syncing tasks by **15+ hours/week**.

Singularities Pvt Ltd

Jan 2023 – May 2024

Software Engineer

Remote

- Accelerated frontend development cycles by **30%** by creating a centralized, reusable, and highly performant UI component library utilizing **Tailwind CSS** and **Storybook**.
- Spearheaded the migration of core product views to **Remix** and **React.js**, leveraging Server-Side Rendering (SSR) to cut initial load times by **45%** and significantly improve SEO.
- Worked in a fast-paced remote agile environment, consistently delivering **100%** of sprint UI deliverables on time while integrating critical third-party APIs.

Projects

MOOC Ed-Tech Platform (Jalshaala) | *React, Next.js, Tailwind CSS, TypeScript*

Live Link

- Developed the complete frontend architecture for a full-scale Ed-Tech platform, driving a **40% increase in student engagement** through interactive, gamified learning UI features.
- Implemented mobile-first responsive designs utilizing **Tailwind CSS**, boosting mobile device user retention by **55%**.
- Engineered an intuitive, user-friendly video streaming dashboard that processes real-time backend API updates with zero frontend lag.

ScalePart (eVehicle Platform) | *React, TypeScript, Tailwind CSS, AI Integration*

Live Link

- Architected a highly polished **React** frontend, transforming raw AI extraction data into interactive data tables, reducing user data verification time by **80%**.
- Implemented advanced React state management (Redux/Context API) to handle **10,000+ DOM nodes** efficiently without frame drops.
- Ensured cross-browser compatibility and responsive design, providing a seamless, native-like user experience across all major platforms.

Technical Skills

Frontend: React.js, Next.js, Remix, TypeScript, Tailwind CSS, Material UI, HTML5/CSS3, Redux
Languages: TypeScript, JavaScript, Go, C++, SQL
Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, REST/GraphQL APIs
Tools: Git, Docker, Postman, VS Code, Webpack/Vite
Other: Responsive Design, Web Accessibility (a11y), Frontend Performance Tuning, AI Integrations

Achievements

- Ranked **1st in College** on **GeeksforGeeks**
- 3 Star** Coder on **LeetCode** (1540 rating, Top 34%)
- Solved **1000+ Data Structure and Algorithm Problems** across LeetCode, GFG, and CodeChef
- Maintained an **831-day longest streak** on **LeetCode**

Education

Rajkiya Engineering College Bijnor

2020–2024

Bachelor of Technology in Electrical Engineering; CGPA: 7.56/10

Bijnor, India
